

Early Crop Map (ECM) – input files – Guidelines (Ref. MOSES D3.1 & D3.5)

In the following the steps for uploading the above files are outlined.

Connect to ESRI ftp server - user: provider

- Connect to ESRI ftp server - user: provider

- Move to the DA_XX/STATIC/ECM_STATIC

Upload the files as specified in the table below – note that only the first file (DA AOI) is mandatory.

Filename	Description	Format	Description
AOI.shp	Demonstration area geographic polygon	Shapefile	Polygon of the area of interest
agricultural_mask.shp	Mask for agriculture areas	Shapefile	Mask to limit the analysis extent to cropland, drastically reducing the spread of misclassification errors; in case such mask is not specified the geographic area polygon can be used
basemap.img	Early-crop map from previous year or other "basemap" chosen by user	Shapefile	To be used in case of unavailable Early Crop Map for the current agronomic year. This shape file must have the same structure of the standard one
mask_fruit.img		Shapefile	Masks of permanent crops, orchards and vineyards which are considered as stable land cover and dealt with masking.
